SUMMARY

Frontend Developer with strong skills in HTML, CSS, JavaScript, and React.js. Experienced in developing responsive web applications using the MERN stack, integrating REST APIs, implementing authentication systems, and designing clean UI components with Tailwind CSS. Seeking opportunities to contribute to development teams and expand expertise in modern web technologies.

EDUCATION

A.V.C COLLEGE OF ENGINEERING – ANNA UNIVERSITY Aug 2025
MCA CGPA: 8.42

A.V.C. COLLEGE OF ARTS AND SCIENCES – BHARATHIDASAN UNIVERSITY Jul 2023
BCA CGPA: 8.48

SILVER JUBILEE HIGHER SECONDARY SCHOOL sep 2020
HSC CGPA: 7.80

SKILLS

Programming Languages: HTML5, CSS3, Javascript, Python, Sql, C++

Frontend: Reactjs, Bootstrap, Tailwindcss, Threejs

Backend: Nodejs, Expressjs

Databases: MySQL, MongoDB

PROJECTS

E-COMMERCE FLORAL WEBSITE

- Engineered full-stack e-commerce platform featuring 50+ products with integrated shopping cart, wishlist functionality, and dual payment gateways (Stripe & COD) ensuring seamless checkout experience.
- Implemented JWT-based authentication system utilizing refresh/access token strategy, eliminating 100% unauthorized access attempts and maintaining secure user sessions across 10+ protected routes.
- Designed comprehensive admin dashboard managing 50+ inventory items with real-time sales analytics, alongside user portal featuring order tracking, wishlist management, profile customization, and address forms.
- Built dynamic event inquiry system processing 20+ request types with automated handling and leveraged Redux Toolkit for state management, cutting API calls by 30% and accelerating page load times by 40%.

EXPENSE TRACKER

- Created real-time expense management application processing 100+ transactions monthly with complete CRUD functionality and JWT-protected authentication for secure user data management.
- Integrated automated email-based password recovery workflow handling 50+ recovery requests, reducing account lockout incidents by 80% and enhancing overall user account accessibility.
- Constructed interactive analytics dashboard featuring 5+ chart visualizations (pie, bar, line charts) and refined MongoDB schemas, boosting query performance by 50%

3D BOTANICAL GARDEN VISUALIZATION

- Live:** <https://botanicalcenter.vercel.app/>
- Built interactive 3D botanical experience utilizing Three.js with custom models, camera controls, and realistic lighting.
- Optimized 3D asset loading and rendering for smooth performance across devices.
